PRODUCT GUIDE

SVGA

2500 lm

2.3 kg

2-in-1 USB display

1 W

A combination of affordability, lightweight design and great functionality make this the ideal projector for any classroom.

Keep the lights on so students can comfortably take notes, this projector series combines a high White and Colour Light Output (CLO) of 2,500 lumens with 3LCD technology for outstanding picture quality, natural colours and brightness.

Dedicated to meet the needs of the classroom, the monitor out provides both projector and PC screen visuals so the teacher doesn't have to turn around to see the screen. Reliable and versatile, this projector is an ideal education partner, designed to make learning more effective. Suitable for even the smallest classroom, it can project large images from a short distance.

Easy to set up with features such as quick-start and instant-off, the projector's manual vertical keystone correction makes aligning slides and correcting distortion straightforward. Display images and control the mouse from either a PC or Mac using a single USB cable. In addition, teachers can keep students' attention focused between slides with the slide-lens shutter that cuts both image and sound in an instant.

Weighing no more than 2.3kg, this compact projector can easily be moved to another classroom to begin the next presentation. Running costs are kept low with the E-TORL lamp lasting 5,000 hours, and built-in security features such as the Kensington lock protect the projector against theft.

KEY FEATURES

- USB Display for fuss-free presenting
- Quick start-up and instant-off functions
- Slide-lens shutter cuts image and sound
- 5000 hours E-TORL long-life lamp
